Mr. Don Smith
Airport Manager,
King County International Airport
Department of Public Works
P.O. Box 80245
Seattle, WA 98108

BOEING

Dear Mr. Smith:

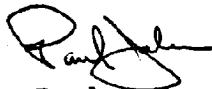

Enclosed you will find two copies each of the Soil and Groundwater Investigation Report and Draft Cleanup Action Program (work plan) for the North Boeing Field Fire Training Center. The investigation report has been submitted to the Department of Ecology under a separate cover letter.

As a result of the findings of our recent investigation the Draft Cleanup Action Program was prepared to describe the tasks associated with proposed cleanup activities. The program will be conducted as an independent cleanup action under the Model Toxics Control Act Cleanup Regulation (WAC 173-340).

In order that we may complete the cleanup action in a timely manner, we would like to meet with you in early January to discuss the details of the investigation findings and our proposed cleanup action. Attached is a copy of the proposed meeting agenda. Brian Anderson of my staff will be calling sometime next week to confirm a date and time for our discussion.

If you have any questions or need additional information please call me or Brian Anderson at 477-1284.
